Discover the fact that people are not born into being different. No one has a purpose to exist. Nature is the creator. First in its rule, then it gives way to life. Then a new species emerges and makes its way, its distinct mark, a civilization. And then a man is born. A man strives and works, builds a home in the universe, to survive. His

struggle to protect his life will be made, an incredible experience. But he doesn't know how much it will take. Will he be rescued? Or will he burn up? Goal Create an environment where people's souls can be awakened. The overall development of the game is based on this premise. It is not an easy feat. This game is a product of almost a year-and-a-half of work by the team, including our advisor, Jan-Oliver Wagner. We are all very proud and have begun this project on a high note. So let's dive into the world of Waking the Dead. Gameplay: A little about the gameplay: We wanted to create a game with high intensity, so we decided to play it with a weapon. We wanted a melee action game with a focus on chaotic fights with a flabby abstract environment, and we ended up with this. An action game for the whole family. We found ourselves with a long and a rough path to overcome, but we did our best and believe that we have accomplished one of the most challenging things in this genre. You are the legendary Dr. Antivirus. His goal is to find missing people who have disappeared. It may seem a little crazy, but there is a logic to it. While we were playing FNV1A, we noticed something unexpected: The player really felt that he was actually in the environment. We thought that it would be cool if we could somehow incorporate this into our game. So, we did exactly that. The player is inside of a body. I can accurately describe the situation by saying that he walks around inside of another body, while carrying his own soul that now has no contact with anything except a terrible fate. This was the key. Dr. Antivirus is no longer just a character of a game. He is a character of a virtual environment. He is a soul who needs to find his way back home. Feeling like this was quite

different from other games. We felt that FNV was a good reference
